LEED for Homes Rating System

RESIDENT FACULTY

Jay Hall, Ph.D.

President

Jay Hall and Associates, Inc.

LEED® AP Homes | USGBC LEED® Faculty™

Dr. Hall has 30 years of experience in the design of sustainable buildings. After earning his undergraduate degree in Canada, he received an M.A.Sc. in Mechanical Engineering, Energy and Thermal Systems, from the University of Windsor in Ontario and later earned his Ph.D. with a focus on Thermal Science from Duke University in North Carolina. Dr. Hall started his career working with ICF Consulting, working on the US EPA's new ENERGY STAR market transformation programs. For 10 years, he led ICF's consulting team for ENERGY STAR for Homes – the nation's most successful program with over 1 million homes labeled.

Seven years ago, Dr. Hall was contracted by US Green Building Council to lead the development of the LEED for Homes program. Dr. Hall was the Acting Director of the national LEED for Homes program for two years.

Dr. Hall's company provides review and approval services for all certified LEED for Homes projects in both the US and Canada. To date, over 10,000 homes have been certified under the LEED for Homes program. He has also provided policy, technical, and education services to a variety of clients including: Enterprise Green Communities, Residential Energy Services Network, The Home Depot Foundation, and Habitat for Humanity International.
